Reimagining Our Economy: *Measuring What Matters*

Learn how to collaborate with government and industry to uphold the commitments outlined in Australia's first wellbeing framework.

Key discussion points include:

- How to integrate economic activities into healthcare practice to promote societal welfare, including factors such as health, education, social cohesion, environmental sustainability, and equitable resource distribution, thereby contributing to the overall well-being of individuals and communities.
- Insights into policies and approaches employed by countries like New Zealand, Scotland, and Finland to prioritise the well-being of people and the planet in economic decision-making.
- The effectiveness of Australia's first wellbeing framework, *Measuring What Matters* in aligning economic policies with broader societal well-being goals.
- The importance of integrating the diverse perspectives of First Nations people and non-Indigenous Australians into healthcare delivery, policy formulation, and research and policy development processes to foster a sustainable and equitable economy aligned with broader societal well-being goals.

SPEAKERS

MONIKA WHEELER
 CEO, Healthy North Coast

KATHERINE TREBECK
 Political economist, writer and
 advocate for economic system change

GEORGINA BRUINSMA
 Senior Manager Aboriginal Leadership and
 Engagement, Social Futures

The Centre for Healthcare Knowledge & Innovation invites health and social care providers, program managers and policymakers, students, researchers, and anyone eager to lead positive systems reform to join on a journey to understanding the factors driving better health outcomes. Together, we can be the catalysts for change, transforming healthcare into a more equitable, patient-centered, and effective system. www.thecentrehki.com.au
